Subject: RE: data and a concern about your property

Hi (b)(6) privacy I got your phone message today (June 18, 2013) and I'm going to respond in writing as you have requested below in your email.

I am sorry that the work performed by our contractor last year does not seem to be effective or is not meeting your needs for flood irrigation. The best approach at this point is for you to get bids to do the land repair for contouring and formally submit those bids for the work to EPA. The bids need to be specific about the work to be performed and at least 3 individual bids will be necessary.

Once EPA receives the bids for the contouring work, they will be submitted to EPA's Office of General Counsel. I cannot promise that EPA will be able to process your bids to do additional work on your property but getting the bids to EPA will put the ball in our court and would require that we respond to you formally.

Dear Greg,

The EPA failed to keep the agreement that they made. I have spent thousands on hay as I am still unable to irrigate the pasture around the well or past the well head and the road the drillers built. (The equivalent of about 15 acres) The company that the EPA hired to do the drilling hauled road base into my field. The area where the pad was nothing is growing. Years of the inability to irrigate the field past the well have caused damage that would require serious repair to put the field back into production. I am hesitant to even discuss this as last time I spoke with anyone they sent a construction company (Shaw) from Denver without contacting me. These guys gave it a try but with a blade and a ditch witch you really can not repair the damage done. Since my initial complaint no one from the EPA has been to my property to discuss this matter. Repeatedly I have been told what the EPA would or would not do to help. At this point I don't know what I am going to do (b)(6) privacy. This started with the first year of drilling when they were going to be done in May and that certainly did not happen. Also I was told that I would receive assistance to build a fence to keep the horses away from the project. That did not happen either. At this point I just feel there is no resolution as it has been years and all I ever hear is that no one knew there was a problem. So good luck to the EPA as I assume that you will not be doing any further testing on my property. If you choose to respond please do so in writing.

Thank you

Subject: data and a concern about your property

Hi (b)(6) privacy Rob just passed an email to me with your phone number as I have been having trouble contacting you. Below is a link to the most recent data. This is currently in a spreadsheet format with other wells. But as you have seen from prior sampling your well number is DW30.

<http://www.epa.gov/region8/superfund/wy/pavillion/phase5/PavillionSeptember2012Appendices.pdf>

If you have trouble viewing or printing this information let me know and I will send you a hard copy.

Also in your email to Rob you mentioned that the property regrading is still not right. I was unaware you were still having issues.

I would like to talk with you when you have time - at your convenience. You can call me at the number below during the day or on my personal cell phone anytime.
